

Research Report 2014

AUSTRALIAN COLLEGE OF THEOLOGY

Research Report 2014

The Australian College of Theology (ACT) has collected all data regarding 2014 publications provided earlier this year in the 2014 affiliated college annual reports submitted to the ACT office.

The ACT, in common with non self-accrediting higher education providers, is not required to submit publication data to the Department of Education (formerly the Department of Education, Employment and Workplace Relations, DEEWR) through the Higher Education Research Data Collection (HERDC) process. Nevertheless we have sought to account for ACT publications as though we were required to report these to the Department of Education.

Only four types of publications are counted in the HERDC process. These are:

- books authored and published by commercial publishers 📖
- chapters in books published by commercial publishers 📄
- journal articles in peer-reviewed journals 📰
- conference papers published in the conference proceedings 🕒

Books count for 5 points. All other eligible publications count for 1 point.

Edited books, book reviews, and articles in journals which are not peer-reviewed are not counted in the HERDC process. The HERDC selection criteria can be accessed at:

<http://docs.education.gov.au/documents/draft-2015-herdc-specifications>

Publications must 'comply with the definition of research' and be characterised, inter alia, by "substantial scholarly activity, as evidenced by discussion of the relevant literature, an awareness of the history and antecedents of work described, and provided in a format which allows a reader to trace sources of the work, including through citations and footnotes" (p.18 of the specifications). In addition the publication must be original, not a compilation of existing works, and validated either through the peer review process or by satisfying the commercial publisher criterion.

Authors must be affiliated with the HEP and provide evidence of affiliation, usually on or within the work being claimed. For research publications other than book chapters, 'where there are multiple authors the count must be apportioned according to the number of authors' (p.21 of the specifications). Thus if there are three authors one-third can be counted for each author

who is affiliated with the HEP. The calculation for book chapters is more complicated (Appendix D, pp. 38-39).

For journal articles evidence that would establish a claim of peer-review could be (p.22 of the specifications):

- the journal is listed on the ARC's ERA 2012 or 2010 journal lists
- the journal is listed in Thomson Reuters Web of Knowledge Master Journal List
- the journal is classified as 'refereed' in the Ulrich's Knowledgebase
- there is a statement in the journal which shows that contributions are peer reviewed
- there is a statement or acknowledgement from the journal editor which shows that contributions are peer reviewed
- a copy of a reviewer's assessment relating to the article.

Books and chapters in books can only be counted in the HERDC exercise if the publisher can be classified as "commercial". HERDC Specifications for Collection of 2015 Data 6.1.2 (p.19) defines a commercial publisher as "an entity for which the fore business is publishing books and distributing them for sale." A publisher is acceptable as a commercial publisher where publishing is not the core business of an organisation but there is a distinct organisational entity devoted to commercial publication and its publications are not completely paid for or subsidised by the parent organisation or a third party. HEP and other self-supporting HEP presses must exercise responsibility for the distribution of the publication in addition to its printing.

The 2014 total of publications that satisfy the HERDC process is:

- Books authored 📖 **85**
- Chapters in books 📄 **35.3**
- Journal articles in peer review journals 📄 **38.8**
- Conference papers published in the conference proceedings 🕒 **1.5**

The 2014 ACT HERDC score is **160.6**
